☐ True. It's not written information so I don't need to worry about plagiarism.

**Question 14****1 / 1 pts**

The following is a source, followed by two examples of paraphrasing. Select the one that does not violate academic integrity:

"But in four cleverly designed experiments, Sparrow and her colleagues do explore how the Internet may be changing the way people handle such information now. The results, she says, support a growing belief that people are using the Internet as a personal memory bank: the so-called Google effect."

Bohannon, J. (2011). Searching for the Google effect on people's memory. *Science*, 333(6040), 277-277.

Sparrow and her colleagues used four experiments to examine how the Internet changes the way people interact with information. Their results suggest that the Google effect means people are using Google to replace their own memories.

But in a few well designed experiments, Sparrow and her colleagues do explore how the Internet may be altering the way people handle such information now. The results, she says, support an increasing belief that people are using the Internet as a personal memory bank: the so-called Google effect.
